

REMARKS

This Amendment is submitted supplementary to the previous Amendment and in connection with the interview with the examiners.

The examiners' highly beneficial cooperation during the interview has been gratefully acknowledged.

In connection with this, Claim 12 has been amended to more clearly define the present invention and to distinguish it from the prior art.

Also, a new Claim 29 has been added which additionally defines the important new features of the present invention.

It is therefore submitted that Claims 12 and 29, as well as the dependent claims, clearly patentably distinguish the present invention from the prior art applied by the examiner and should be allowed.

Reconsideration and allowance of the present application is most respectfully requested.

Please let us have the examiner's amendment.

Respectfully submitted,

/ Michael J. Striker /
